

## Staco Systems successfully completed the design and production of 30 unique cockpit control panels for CEA Design GmbH

**Irvine, CA – May 25th 2022**– Staco Systems announced that it has successfully completed the design and production of a complete set of 30 unique cockpit control panels for the P01 trainer aircraft being built by CEA Design GmbH in Austria. This was achieved with the assistance of our Swiss partner, Swiftrade GmbH. CEA Design selected Staco Systems among several international suppliers based on the development time, experience and quality of their illuminated NVIS control panels. We are proud to have been able to satisfy their requirements within only 16 weeks from design to supply and we look forward to working with CEA Design again on an upcoming new trainer aircraft upgrade program. CEA Design has more than 20 engineers specialized in aviation design, prototype production and flight certification. Swiftrade has been a Staco Systems partner for several years specialized in the supply of components and subsystems to the military, aerospace and defence markets.
